

MOLYSLIP E

Engine Oil Supplement

Molyslip E Oil Supplement
Part # 3412 300mL

Molyslip E Oil Supplement (E) is a unique suspension of 0.5 micron particles of molybdenum disulfide (MoS₂) that:

- Plates onto internal engine surfaces
- Produces a friction-reducing barrier that does not drain off
- Prevents metal-to-metal contact
- Blends with all leading motor oils, including synthetics
- Will NOT clog oil filters or oil passageways
- Ideal for both diesel and gasoline engines

Molyslip E SAVES money!

Reduces Fuel Consumption - In a recent independent test carried out by the City of Brampton on two Chevrolet S-10 pickup trucks fuel savings were shown to be 8.7%.

After deducting the cost of Molyslip E, net fuel savings for a small pickup trucks could total more than \$1,000/pickup per year.*

A fleet of 9 vehicles could have a net savings of over \$10,000 per year.*

Reduces Maintenance - Molyslip E's plating action leaves engine components well lubricated at all times, even after a long period of inactivity. This prevents metal-to-metal contact and reduces wear especially during cold starts when the oil has drained into the oil pan. The friction reducing properties of Molyslip E also reduce engine wear, a major cause of component failure.

E OIL SUPPLEMENT is part of the Molyslip family of specialty lubricants:

- AS/40 and AS/65 assembly pastes
- hydraulic and gear oil supplements
- Copaslip anti-sieze compound
- high temp grease
- multi-purpose grease
- ultra-5 extreme duty grease
- diesel fuel conditioner
- combat penetrating oil
- moly spray grease
- open gear spray
- air drying moly spray

* See City of Brampton insert for specifics regarding the test results and computations of figures
